PROFILE

A highly motivated and dedicated individual with a passion for technology and learning. Skilled in web development, with expertise in both frontend and backend technologies, and a growing interest in machine learning and artificial intelligence. Committed to continuous improvement and applying innovative solutions, Aashish excels at delivering high-quality results across diverse projects. Reliable and adaptable, ready to take on new challenges in the evolving tech landscape

WORK EXPERIENCE

College Project

Restaurant management system

- Developed a Restaurant Management System using HTML, CSS, JavaScript, and PHP.
- Handled user requests for orders, reservations, and menu updates with real-time processing
- Implemented dynamic, responsive UI for seamless user interaction across devices..
- Integrated backend features for order management, inventory tracking, and reporting.
- Optimized the system for scalability, security, and business needs.

College Project

Career recommendation system

- Developed a Career Recommendation System utilizing a dataset containing features like grades, extracurricular activities, and skills
- Trained the model using the Random Forest algorithm in Python, ensuring robust predictive performance.
- Implemented a Flask-based web application for user input and real-time career recommendations.
- Provided personalized career guidance, matching users with the best fields based on their profiles
